FAQ

Question: What types of collagen are in Xyngular Collagen?

Answer: Xyngular Collagen contains collagen types I, II, III, V, and X.

Question: Is Xyngular Collagen ethically sourced?

Answer: Yes, Xyngular Collagen is sourced from grass-fed bovine, wild-caught whitefish, and cage-free chicken. These carefully selected sources support collagen quality, while the extraction process eliminates harsh chemicals.

Question: What makes Xyngular Collagen different from other collagen products on the market?

Answer: Xyngular Collagen is made with a unique composition of ingredients. With three different sources of collagen types I, II, III, V, and X, it allows for a higher quantity of amino acids, and the ability to support a variety of different areas in the body. It also includes collagen-specific digestive enzymes, as well as fulvic minerals and vitamin C to improve collagen absorption and natural collagen production. Finally, we perform heavy metal testing on each lot to ensure levels meet standards.
